List of Standards Referenced in Model, State and Major City Building Codes	A1-A432

ABSTRACT

This publication provides a compilation of the standards that are referenced in the building codes promulgated by: (1) the three model building code organizations; i.e., Building Officials and Code Administrators International, Inc. (BOCA); International Conference of Building Officials (ICBO); and the Southern Building Code Congress International, Inc. (SBCC); (2) the 20 States that have either mandatory or voluntary building codes; and (3) the 30 largest U.S. cities. In addition to identifying each standard referenced in the above-named codes, this publication lists the current date of the standard, its title, the codes referencing it, the date of the code, the locations within the code where the standard is referenced, and the date of the standard referenced in the code. This publication is intended to provide a base for assisting the building community in updating, utilizing and maintaining the standards referenced in building codes.'

Key Words

Building codes; building regulations; building regulatory system; standards

ACKNOWLEDGEMENTS

The author is indebted to the following persons who assisted in the computer development of the list of standards referenced in building codes: Mr. Paul Majewski, Mathematician, Computer Information Section, Information Technology Division, Institute for Computer Sciences and Technology; Mrs. Ethelene Lewis, Library Technician, Standards Information and Analysis Section, Standards Application and Analysis Division, IAT; Dr. Lawrence E. Eicher, Chief, Standards Information and Analysis Section, Standards Application and Analysis Division, IAT; and Mr. William J. Slattery, Manager, Standards Information Services, Standards Application and Analysis Division, IAT. Mr. Robert J. Kapsch, Assistant Chief, Office of Building Standards and Codes Services, is acknowledged for his constructive suggestions and Mr. James G. Gross, Chief, Office of Building Standards and Codes Services, for overall direction.

I. BACKGROUND

Building codes are comprehensive legal documents regulating the construction, alteration and repair, or modification of buildings so as to provide for the safety, health, and welfare of their occupants or users. Building codes are legal documents developed by legislative action of the State, city municipality, or other jurisdiction, for which they apply. They are also comprehensive technical documents reflecting the results of building research and the opinion of the Nation's experts in all facets of building technology related to safety and health. As comprehensive technical documents, building codes make reference to or include portions of nationally recognized building standards--a typical building code references approximately 300 standards. These standards are developed and promulgated by such nationally recognized organizations as the American National Standards Institute (ANSI), the American Society for Testing and Materials (ASTM), the National Fire Protection Association (NFPA), and others. These referenced standards, along with code provisions contained in the building code, become the legal minimum criteria which building designers and constructors must meet for new construction, alteration and modification of buildings.

Promulgators of model, State and city building codes have a continuing problem of updating those standards adopted by reference in their codes. In general, the code writers rely on industry representatives to provide the necessary information for standard reference updating. However, industry representatives cannot meet with all of the agencies responsible for promulgating codes; therefore, many of the building codes in the United States contain standard references which are obsolete--or quite often--no longer in existence.

Since 1970, extensive gains have been made in obtaining greater uniformity among building codes. However, it has been estimated that there exists some 7,000 individual building codes in the United States. Resolving differences between these building codes is an extremely large task involving critical technical judgments, assessment of variations due to geographical or urban differences, reaching of consensus on a multitude of subjects from standards format to fire safety provisions, and other factors. Although this publication does not address all of the complexities, it is intended that the compilation and comparative listing of referenced standards will assist those working toward greater building code uniformity.

This compilation is built upon earlier work accomplished by the Model Codes Standardization Council (MCSC). MCSC, an independent organization which includes among its several identified goals the development of greater uniformity in the building regulatory system of the United States, is made up of two groups--one consisting of voting members and the other consisting of advisory members. These include trade associations, standards developing organizations, model building code groups, Federal agencies, professional societies, and other related building regulatory groups. The complete listing is contained in Appendix A.

In 1972, MCSC undertook a project to develop a list of those primary standards referenced in at least two or more of the model building-related codes which are utilized by building officials in the effective administration and enforcement of the codes in force in their jurisdiction. Among the purposes of this list were: (1) to establish a uniform list of standards, and (2) to provide a vehicle for readily identifying changes in edition dates for each of the standards. In addition to the members of MCSC, the list was developed with assistance of an industry-oriented advisory group. This was the first known effort to compile this necessary information.

In making the decision to develop this document, it was determined that a service could be provided to the building community by expanding on the initial work of the MCSC. Rather than limiting the list of standards to those referenced in at least two of the model codes which are necessary for the effective administration and enforcement of the code, it was determined that the following should also be included: (1) in addition to the model building codes; i.e., those promulgated by BOCA, ICBO and SBCC, the building codes in those States which have adopted statewide building codes and the building codes of the 30 largest U.S. cities (identification of each building code is provided in Part III); (2) identification of the current date of the standard; (3) identification of appropriate section of each code in which the standard is referenced; and (4) the date of the standard referenced.

II. CONTENT AND UTILIZATION OF TABLES

The following data relative to standards utilization in building codes and their potential use to the building regulatory community are included: (1) location of the standard reference in each building code to facilitate easy amendment when the date of the standard changes; (2) data base for ascertaining which standards are in widespread use; (3) identification of seldom used standards in order that studies can be initiated to determine the reasons that the standard is used in one code and not in another; (4) providing the Occupational Safety and Health Administration (OSHA), and other interested Federal agencies and organizations, with a compilation of the utilization of standards by various building regulatory authorities, providing an important data base for the promulgation of future Federal regulations; (5) identification of those standards that have the highest priority for conversion to metric and for use in a dimensional coordination program; and (6) a data base for organizations such as the Council of American Building Officials (CABO), the Model Codes Standardization Council, the Board for the Coordination of the Model Codes (BCMC), the National Conference of States on Building Codes and Standards, Inc. (NCSBCS), the Association of Major City Building Officials (AMCBO), and the individual model code organizations, as well as individual regulatory agencies, in working towards improvement of building codes through utilization of up-to-date standards.

This document provides information relative to standards utilization as listed below for the various segments of the building community.

o For the Building Regulatory Community

- Current date of referenced standards
- Correct title of standard
- Organization generating the standard and the correct address of the organization
- Location in building code where the standard is referenced
- Date of the standard referenced in the building code, thus identifying a need for updating the standard reference
- Standards which have been discontinued or superseded
- Standards which should be considered for future reference in the building code
- Basis for establishing a standards reference library

- o For Standards Generating Organizations
 - User, or nonuser, of a particular standard
 - Adequacy of the referenced standard relative to date
 - Adequacy of standard reference in the building code
 - A basis for comparing codes for uniformity
 - Areas where no standards exist
- o For Designing Professionals
 - Basis for identifying design standards in other jurisdictions
 - A professional society activity guide
 - Basis for establishing a standards reference library
 - Current assessment of the state-of-the-art on design standards
 - Areas of concern in the design of projects in other jurisdictions
- o For Federal Government Agencies
 - Possible conflicts between Federal and local regulations
 - Codes which will probably comply with Federal programs such as OSHA, Medicaid and Medicare
 - Codes which may require updating and where possible Federal participation should be considered
 - Identification of areas where no applicable standards exist
- o For Industrial Organizations (including trade associations)
 - Utilization of standards developed by these organizations
 - Determination of standards which should be developed
 - Adequacy of standards referenced in building codes

III. BUILDING CODES INCLUDED IN STUDY

The following building codes are included in this compilation:

1. Model Building Codes (abbreviations and current date)
 - a. 1975 Basic Building Code (BBC) as promulgated by the Building Officials and Code Administrators International, Inc.
 - b. 1973 Standard Building Code (SBC) with its 1975 revisions as promulgated by the Southern Building Code Congress International, Inc.
 - c. 1973 Uniform Building Code (UBC) with its 1975 amendments promulgated by the International Conference of Building Officials

2. State Building Codes (abbreviations and effective dates of codes):

- a. Alaska (AK) - 1974 Code
- b. Connecticut (CT) - 1971 Code with 1974 Amendments
- c. Georgia (GA) - 1974
- d. Idaho (ID) - 1975
- e. Indiana (IN) - December 30, 1974
- f. Maryland (MD) - 1970 with 1974 Amendments
- g. Massachusetts (MA) - 1974 with April 11, 1975, Amendments
- h. Michigan (MI) - 1975
- i. Minnesota (MN) - January 14, 1974
- j. Montana (MT) - 1974
- k. New Jersey (NJ) - 1976
- l. New Mexico (NM) - 1974 with February 28, 1974, Amendments
- m. New York (NY) - 1972 with April 1975, Amendments
- n. North Carolina (NC) - 1967 with January 1, 1975, Amendments
- o. Ohio (OH) - October 15, 1974
- p. Oregon (OR) - August 30, 1974
- q. Rhode Island (RI) - 1975
- r. Virginia (VA) - 1976
- s. Washington (WA) - 1975
- t. Wisconsin (WI) - 1975

3. Major City Building Codes (date of edition used):

- a. Atlanta - 1974
- b. Baltimore - 1971
- c. Boston - 1974 with April 11, 1975, Amendments
- d. Chicago - 1973 with November 1975, Amendments
- e. Cincinnati - 1970 with March 26, 1974, Amendments
- f. Cleveland - April 1, 1973
- g. Columbus - 1974
- h. Dallas - 1974

- i. Denver - 1975
- j. Detroit - 1970 with 1974 Amendments
- k. District of Columbia - 1972 with October 15, 1973, Amendments
- l. Houston - 1974
- m. Indianapolis - December 30, 1974
- n. Jacksonville - 1974
- o. Kansas City, Missouri - 1975
- p. Los Angeles - 1972 revised to October 1, 1974
- q. Memphis - 1974
- r. Milwaukee - 1975
- s. Nashville - October 24, 1974
- t. New Orleans - 1949 revised to January 1975
- u. New York - 1974 revised to January 1975
- v. Philadelphia - 1973
- w. Phoenix - 1970 revised to January 1975
- x. Pittsburgh - 1960
- y. St. Louis - 1970 with 1974, Amendments
- z. San Antonio - 1975
- aa. San Diego - 1975
- bb. San Francisco - 1975
- cc. San Jose - 1975
- dd. Seattle - 1975

IV. FORMAT OF TABULAR PRESENTATION

The tabular presentation of the standards referenced in building codes is based on the alphabetical listing of the standards-generating organizations. Appendix B contains the addresses and acronyms for the eighty-one organizations which have developed standards included in the study.

As illustrated in Figure 1, each standards generating organization is listed along with the standards which are included in at least one building code. In general, these standards are listed by the standard numbers and name assigned by the generating organization. This is not always the case since several standards-generating organizations do not assign numbers to their standards. When this occurs, identifying numbers and/or letters have been arbitrarily assigned to facilitate identification by the computer. Additional information provided for each referenced standard includes: (1) current date of the standard as well as the date referenced in the building codes; (2) names and current date of the building codes which reference the standard; and (3) section in each included code where the standard is referenced.

APPENDIX A
ORGANIZATIONS INCLUDED IN THE MODEL CODES STANDARDIZATION COUNCIL (MCSC)

Voting Members

American Insurance Association (AIA)
American National Standards Institute (ANSI)
American Society for Testing and Materials (ASTM)
Building Officials and Code Administrators International, Inc. (BOCA)
U.S. Department of Housing and Urban Development (HUD)
International Association of Plumbing and Mechanical Officials (IAPMO)
International Conference of Building Officials (ICBO)
U.S. Department of Commerce, represented by the National Bureau of Standards (NBS)
National Conference of States on Building Codes and Standards, Inc. (NCSBCS)
National Fire Protection Association (NFPA)
National Research Council of Canada (NRCC)
Southern Building Code Congress International, Inc. (SBCC)
Underwriters' Laboratories, Inc. (UL)

Advisory Members

Aluminum Association (AA)
American Hospital Association (AHA)
American Institute of Architects (AIA)
American Iron and Steel Institute (AISI)
American Plywood Association (APA)
American Society of Civil Engineers (ASCE)
American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc. (ASHRAE)
American Wood Preservers Institute (AWPI)
Brick Institute of America (BIA)
Building Research Advisory Board (BRAB)
Gypsum Association (GA)
National Association of Building Manufacturers (NABM)
National Association of Home Builders (NAHB)
National Forest Products Association (NFoPA)
Plastic Pipe Institute (PPI)
Portland Cement Association (PCA)
Society of the Plastics Industry (SPI)
Tile Council of America (TCA)

INDEX OF STANDARDS GENERATING ORGANIZATIONS

<u>Organization</u>	<u>Page</u>
Aluminum Association (AA)	A 1
Architectural Aluminum Manufacturers Association (AAMA)	A 2
American Association of State Highway and Transportation Officials (AASHTO)	A 3
American Boiler Manufacturers Association (ABMA)	A 4
Acoustical and Board Products Association (ABPA)	A 5
American Conference of Governmental Industrial Hygienists (ACGIH)	A 6
American Concrete Institute (ACI)	A 7
American Gas Association (AGA)	A 13
Associated General Contractors of America (AGCA)	A 14
American Insurance Association (AIA)	A 15
American Institute of Steel Construction, Inc. (AISC)	A 16
American Iron and Steel Institute (AISI)	A 20
American Institute of Timber Construction (AITC)	A 22
American Lumber Standards Committee (ALSC)	A 24
American National Standards Institute (ANSI)	A 25
American Plywood Association (APA)	A 72
American Public Health Association (APHA)	A 78
American Petroleum Institute (API)	A 79
American Railway Engineering Association (AREA)	A 80
American Society of Cinematographers (ASC)	A 81
American Society of Civil Engineers (ASCE)	A 82
American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE)	A 83
American Society of Mechanical Engineers (ASME)	A 85
American Society of Sanitary Engineering (ASSE)	A 87
American Society for Testing and Materials (ASTM)	A 88
American-Wood Preservers' Association (AWPA)	A192
American Wood Preservers Bureau (AWPB)	A198
American Wood Preservers Institute (AWPI)	A204
American Welding Society, Inc. (AWS)	A206
American Water Works Association, Inc. (AWWA)	A209
Brick Institute of America (BIA)	A210
Building Officials and Code Administrators International, Inc. (BOCA)	A212
Civil Aeronautics Administration (CAA)	A213
Canadian Government Specifications Board (CGSB)	A214
Cast Iron Soil Pipe Institute (CISPI)	A215
California Lathers and Plasters Contractors Association (CLPCA)	A216
Canvas Products Association, International (CPAI)	A217
Defense Civil Preparedness Agency (DCPA) (formerly DCDM)	A218
Federal Communications Commission (FCC)	A219
Federal Housing Administration (FHA)	A220
Factory Mutual System (FMS)	A221
Federal Specifications - GSA (FS)	A222
Gypsum Association (GA)	A243
Housing and Home Finance Agency (HHFA)	A244
Hardwood Plywood Manufacturers Association (HPMA)	A245
Home Ventilating Institute (HVI)	A246
Hydronics Institute (HYDRO)	A247
Institute of Boiler and Radiator Manufacturers (IBRM)	A248
Illuminating Engineering Society (IES)	A249
Industrial Fasteners Institute (IFI)	A251
Incinerator Institute of America (IIA)	A252
International Organization for Standardization (ISO)	A253
Metal Building Manufacturers Association (MBMA)	A254
Manufacturing Chemists' Association (MCA)	A255
Mechanical Contractors Association of America (MCAA)	A256
Maple Flooring Manufacturers Association (MFMA)	A257

National Board of Boiler and Pressure Vessel Inspectors (NBBPV)	A258
National Concrete Masonry Association (NCMA)	A259
National Environmental Systems Contractors Association (NESCA)	A260
National Forest Products Association (NFORPA)	A261
National Fire Protection Association (NFPA)	A264
Northern Hardwood and Pine Manufacturers Association, Inc. (NHPMA)	A294
Northeastern Lumber Manufacturers Association, Inc. (NLMA)	A295
National Oak Flooring Manufacturers Association, Inc. (NOFMA)	A296
National Particleboard Association (NPA)	A297
National Pest Control Association (NPCA)	A298
National Warm Air Heating and Air Conditioning Association (NWAHACA) (known as NESCA)	A299
National Woodwork Manufacturers Association (NWMA)	A300
Research Council of Riveted and Bolted Structural Joints (RCRBS)	A301
Red Cedar Shingle and Handsplit Shake Bureau (RCSHS)	A302
Redwood Inspection Service (RIS)	A303
Society of Automotive Engineers, Inc. (SAE)	A304
Steel Boiler Institute (SBI)	A306
Southern Forest Products Association (SFPA)	A307
Steel Joist Institute (SJI)	A308
Sheet Metal and Air Conditioning Contractors National Association, Inc. (SMACNA)	A309
Society of the Plastics Industry, Inc. (SPI)	A310
Southern Pine Inspection Bureau (SPIB)	A311
Scaffolding and Shoring Institute (SSI)	A312
Truss Plate Institute, Inc. (TPI)	A313
Uniform Building Code - 1970 Edition (UBC 70)	A314
Uniform Building Code - 1973 Edition (UBC 73)	A334
Underwriters' Laboratories, Inc. (UL)	A407
U.S. Army (USA)	A413
U.S. Department of Agriculture - Forest Products Lab (USDAFP)	A414
U.S. Department of Commerce - Bureau of Standards (USDCBS)	A415
U.S. Department of Health, Education and Welfare (USDHEW)	A428
Naval Publications and Forms Center (USDOD)	A429
Vermiculite Institute (VI)	A430
West Coast Lumber Inspection Bureau (WCLIB)	A431
Western Wood Products Association (WWPA)	A432

15. SUPPLEMENTARY NOTES				
16. ABSTRACT (A 200-word or less factual summary of most significant information. If document includes a significant bibliography or literature survey, mention it here.) This publication provides a compilation of the standards that are referenced in the building codes promulgated by: (1) the three model building code organizations; i.e., Building Officials and Code Administrators International, Inc. (BOCA); International Conference of Building Officials (ICBO); and the Southern Building Code Congress International, Inc. (SBCC); (2) the twenty States that have either mandatory or voluntary building codes; and (3) the thirty largest U.S. cities. In addition to identifying each standard referenced in the above named codes, this publication lists the current date of the standard, its current title, the codes referencing it, the date of the code, the locations within the code where the standard is referenced, and the date of the standard referenced in the code. This publication is intended to provide a base for assisting the building community in updating, utilizing and maintaining the standards referenced in building codes.				
17. KEY WORDS (six to twelve entries; alphabetical order; capitalize only the first letter of the first key word unless a proper name; separated by semicolons) Building codes; building regulations; building regulatory system; standards
